

# Bat Call Playback

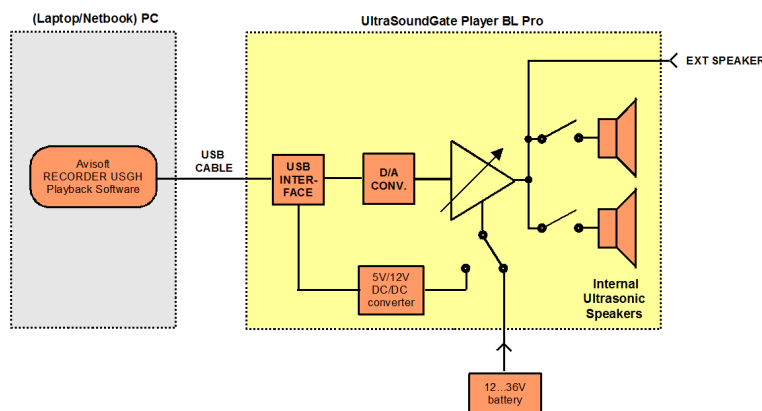

Increase your mist net capture rates by using an acoustic lure!

Avisoft Bioacoustics UltraSoundGate Player BL Pro is a full-featured ultrasound playback unit for luring bats. The system consists of an USB computer interface, D/A converter, power amplifier, speaker(s), tripod mount and playback software. The unit can be powered either entirely from a laptop/netbook PC through the USB interface (bus-powered) or by an external 24...36 V battery in order produce maximum possible sound levels.

The comfortable playlist feature of the accompanying RECORDER USGH software allows to play both original, noise-reduced or fully synthesized bat calls in random order and at random intervals.

A growing collection of European bat sounds that are suited for this purpose is available at [www.batcalls.com](http://www.batcalls.com).
